

Frequency inverters

0.25 ... 132 kW

Lenze inverters – universally applicable

A multifunctional solution for all applications – just another way to perfectly describe the frequency inverter. Thanks to a high number of integrated functions, network interfaces and a simple parameter setting, the inverter is suitable for both mechanical engineering and machine construction.

Lenze inverters are an important component in modern drive solutions which range from the cloud via control systems to motors and geared motors.

Typical application fields

- Textile machines
- Materials handling technology
- Packaging technology
- Forming technology
- Commercial HVAC (pumps, fans, and compressors)
- Wood working
- Car washes
- And many more

Features

- The modular and scalable concept allows for the selection of the right inverter required for the respective application.
- The compact design allows an efficient installation for applications where space means money.
- Energy efficiency and high functionality

The benefits for you

- Lower investment costs
- Less control cabinet space
- More productivity
- More time for innovation
- Sustainability
- Reliability

Features at a glance

Compact design

In mechanical engineering and machine construction, space is limited and expensive. Thus, Lenze inverters are extremely compact to implement solutions and save costs.

The i510 cabinet and i550 cabinet frequency inverters impress due to a space-saving design with a width of 60 mm (up to 4 kW) and a depth of just 130 mm (up to 11 kW). Moreover, the devices can be mounted directly next to each other without derating.

Flexibility

Lenze offers one of the most comprehensive solution portfolios for mechanical and plant engineering.

No matter which power, mains voltages, communication interfaces, or diagnostics options – our product range has the right solution optimized for the requirement.

User-friendliness

Many small details in the device facilitate handling and significantly reduce the time required for installation, commissioning, and service. These include voltage-free parameterization, simple menu navigation, practical factory settings, and pluggable connections.

Centralized/ decentralized

Many machines provide enough space for a compact frequency inverter such as the i510 cabinet or i550 cabinet.

In many applications, a mixture of centralized and decentralized drive technology is advisable. Fortunately, all Lenze frequency inverters have a similar drive behavior and can be commissioned with the same engineering tools.

Innovative

Innovative functions for a safe operation. Two examples:

Easy engineering and reduction of system costs through integration of limited IO-Link master functionality in the i550/i650 motec.

Regenerative energy feedback by the i550/i650 motec in case of dynamic braking reduces energy consumption. This simplifies engineering and saves the cost of a brake resistor.

Energy-efficient

Lenze inverters comply with the Ecodesign Directive, achieve the lowest possible energy losses, and thus ensure optimum efficiency in system design.

Scaled portfolio for machines

Competitiveness in mechanical engineering is becoming increasingly challenging due to rising requirements in terms of energy efficiency and machine intelligence, along with a shortage of skilled personnel and cost pressure.

The frequency inverters are facing up to these challenges and are already equipped for the future.

The EASY Engineering Tools simplify the engineering of the machine and support the selection of the most suitable controllers, frequency inverters and motors - energy-efficiently and sustainably.

You can easily call up a lot of Info online when selecting a product:

- Use the EASY Product Finder to configure your required version of the product in next to no time (simply click on the  icon).
- For further technical details such as data sheets, CAD data or EPLAN data, please contact our support team simply click on the  icon).

i510 cabinet

The i510 cabinet frequency inverter is a compact control cabinet device with scalable functionality. It is versatile, reliable, and easy to use.

The requirements of the Ecodesign Directive, standard EN IEC 61800-9-2, are met.

Application areas: Conveyor drives, traveling drives, pumps, fans, ...

Mains connection/power range

1 AC 230/240 V	0.25 ... 2.2 kW
3 AC 230/240 V	0.25 ... 5.5 kW
3 AC 400 V	0.37 ... 15 kW

Highlights

- Space saving design: 60 mm wide (up to 4 kW), 130 mm deep (up to 11 kW), with zero-clearance mounting
- Innovative interaction (e.g. over WLAN) makes new record-breaking commissioning times and convenient diagnostics a reality
- Special user-friendliness

i550 cabinet

The i550 cabinet frequency inverter is a compact control cabinet device with scalable functionality. It is versatile, reliable, and easy to use.

The requirements of the Ecodesign Directive, standard EN IEC 61800-9-2, are met.

Application areas: Conveyor drives, traveling drives, winding drives, hoist drives, extruders, packaging machines, pumps, fans, ...

Mains connection/power range

1 AC 120 V	0.25 ... 1.1 kW
1 AC 230/240 V	0.25 ... 2.2 kW
3 AC 230/240 V	0.25 ... 5.5 kW
3 AC 400 V	0.37 ... 132 kW
3 AC 480 V	0.37 ... 132 kW

Highlights

- Space saving design: 60 mm wide (up to 4 kW), 130 mm deep (up to 11 kW), with zero-clearance mounting
- Innovative interaction (e.g. over WLAN) makes new record-breaking commissioning times and convenient diagnostics a reality
- Optionally available with "Safe Torque Off (STO)" with SIL 3 (EN IEC 62061/EN°IEC 61508) and Performance Level e (EN ISO 13849-1)
- For the greatest possible flexibility available as a complete device or in individual parts (Power Unit, Control Unit and Safety Unit)

i550 protec

The i550 protec frequency inverter uses the same tried-and-tested technology used in control cabinet inverters and differs in terms of a higher degree of housing protection and an adapted design. If there is not enough space in the control cabinet or the inverter has to be mounted close to the motor in various machine modules, then this versatile and reliable device is the right solution. Thanks to the extension box, a disconnect switch and operating elements can be used.

The requirements of the Ecodesign Directive, standard EN IEC 61800-9-2, are met.

Application areas: Conveyor drives, traveling drives, winding drives, hoist drives, extruders, packaging machines, pumps, fans, ...

Mains connection/power range

1 AC 120 V	0.37 ... 1.1 kW
1 AC 230/240 V	0.37 ... 2.2 kW
3 AC 230/240 V	0.37 ... 45 kW
3 AC 400 V	0.37 ... 75 kW
3 AC 480 V	0.37 ... 75 kW
3 AC 600 V	0.37 ... 22 kW

Highlights

- Decentralized drive with IO-Link interface V1.1
- Integrated diagnostic interface (micro USB) for service purposes
- Versions with or without disconnect switch, with keypad or WLAN module for easy commissioning
- Optionally available with "Safe Torque Off (STO)" with SIL 3 (EN IEC 62061/EN°IEC 61508) and Performance Level e (EN ISO 13849-1)

i550 motec

The i550 motec frequency inverter for wall mounting and motor mounting in protection class IP66 is the optimal decentralized drive solution. The inverter can be extended for universal use with an extension box with disconnect switch with/without Type E combination motor controller and operating elements.

Fast mounting and easy commissioning thanks to user-friendly tools as well as connections for commercially available connectors are the focus of this inverter. Parameters, drive behavior and usability correspond to our proven frequency inverters. Rounded off by high energy efficiency, we thus offer a modern and sustainable drive solution.

The requirements of the Ecodesign Directive, standard EN IEC 61800-9-2, are met.

Application areas: Conveyor drives, traveling drives, winding drives, hoist drives, extruders, packaging machines, pumps, fans, ...

Mains connection/power range

3 AC 230/240 V	0.37 ... 22 kW
3 AC 400 V	0.37 ... 45 kW

Highlights

- Compact solution for decentralized drive technology, wall-mounted or motor-mounted with high IP66 protection (UL Type 4X indoor)
- Wall-mounted extendable: Extension box with disconnect switch with/without Type E combination motor controller and operating elements
- Fast mounting due to pluggable, standardized connections (plug & play)
- Four IO-Link ports with limited IO-Link master functionality for easy data exchange between IO-Link sensors and actuators
- Integrated regenerative module for very high energy efficiency - a brake resistor is no longer required

i650 motec

The i650 motec frequency inverter for wall and motor mounting stands out from the i550 motec due to the "Extended Safety" option (safety technology with various functions).

The requirements of the Ecodesign Directive, standard EN IEC 61800-9-2, are met.

Application areas: Conveyor drives, traveling drives, winding drives, hoist drives, extruders, packaging machines, pumps, fans, ...

Mains connection/power range

3 AC 230/240 V	0.37 ... 22 kW
3 AC 400 V	0.37 ... 45 kW

Highlights

- Compact solution for decentralized drive technology, wall-mounted or motor-mounted with high IP66 protection (UL Type 4X indoor)
- Wall-mounted extendable: Extension box with disconnect switch with/ without Type E combination motor controller and operating elements
- Fast mounting due to pluggable, standardized connections (plug & play)
- Four IO-Link ports with limited IO-Link master functionality for easy data exchange between IO-Link sensors and actuators
- Integrated regenerative module for very high energy efficiency - a brake resistor is no longer required
- Extended range of functions: Extended Safety

Accessories

By simply selecting the accessories, the operation of the inverter can be optimally adjusted. This is how a modern drive solution can be safely achieved.

The scalable concept enables easy selection, sophisticated accessories saves space and time during installation, and energy-efficient requirements can be optimally solved. Your benefits from this are more productivity and functional safety as well as sustainability and reliability.

Info on accessories can be found on the Internet and in the brochure "Accessories for frequency inverters and servo inverters".
